

In this data report, we analyse France holdings among active Global Funds. For benchmark comparisons, we use the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap, proportionally adjusted to remove any cash holdings. The current fund sample spans 365 active funds with a combined AUM of \$906.94Bn.

We analyse the latest published filings for all funds and aggregate together as of 6/30/2022. We show the most recent snapshot in positioning, time series data going back to 9/30/2012 and recent allocation shifts by the managers in our analysis.

All Cash Flow calculations are on a best estimates basis. We use monthly position changes and month end prices to estimate the net buying and selling value for each stock within each fund in our analysis.

Peer Group and Time-Series Ownership Data

Chart 1. The equally weighted average fund weight, among active Global managers by Country Chart 2. The time series of average fund weight for France stocks

Chart 5. The 'Funds Invested %' measures the percentage of active Global funds with exposure to each Country. A figure of 100% means that every fund in our analysis has some exposure to that Country Chart 6. The time series of funds invested % for France stocks

Chart 3. The average fund weight minus the weight in the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap, by Country. A positive value represents an 'overweight' position on average, a negative value represents an 'underweight'.

Chart 7. The percentage of active Global funds who are overweight the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap weight, by

Chart 8. The time series of Funds Overweight % for France stocks

Fund Holdings

Chart 1. The distribution of France weights among the 365 active Global funds in our analysis, broken down by fund Style. Chart 2. The largest 30 France holders in our analysis, on a portfolio weight basis.

Chart 3. The individual France fund weights funds in our analysis, ranked by allocation size with Median and Quartiles. Chart 4. The largest 30 France holders in our analysis, on an \$ AUM basis.

Aggregate Ownership Changes

Chart 1. Measures the largest changes in average Country weight between 12/31/2021 and 6/30/2022.

Chart 3. Measures the largest changes in the percentage of funds invested in each Country between 12/31/2021 and 6/30/2022.

Chart 5. Shows the cumulative fund flows for France stocks among the 365 active Global funds in our analysis. Monthly fund flows are estimated by multiplying the monthly change in stock position by the stock price for every position in every fund in our analysis.

Chart 2. Measures the largest changes in the average Country weight vs ACWI between 12/31/2021 and 6/30/2022. An increasing figure would indicate an increasing averweight or decreasing underweight.

Chart 4. Measures the largest changes in the percentage of funds overweight each Country compared to the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap between 12/31/2021 and 6/30/2022. An increasing figure would indicate more funds are positioning themselves overweight over the period.

Chart 6. Measures the largest estimated fund flows for each Country between 12/31/2021 and 6/30/2022.

Fund Holding Changes

Chart 1. The largest fund weight increases in France stocks between 12/31/2021 - 6/30/2022.

Chart 2. The largest fund weight decreases in France stocks between 12/31/2021 - 6/30/2022

Both charts show the current weight and whether the weight change represented a new or closed position.

Chart 3. The largest buyers in US dollar terms in France stocks between 12/31/2021 - 6/30/2022. Chart 4. The largest sellers in US dollar terms in France stocks between 12/31/2021 - 6/30/2022 Both charts show the current AUM and whether the fund flow represented a new or closed position.

Country Sentiment Grid

Sentiment Grid: We combine the latest Country positioning, long-term positioning and short-term fund activity in the 'Sentiment Grid', below. The Y-Axis measures where today's ownership levels in each Country sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 9/30/2012). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 12/31/2021 and 6/30/2022, relative to each Country. A figure above 50% means a Country has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each Country.

Position Range: Average of:

Z-Score Average Weight vs history
Z-Score Funds Invested % vs history

Z-Score Funds O/W % vs history

Momentum Score: Average of: Change in Average Weight (Percentile vs Peers) Change in Funds Invested % (Percentile vs Peers) Change in Funds O/W % (Percentile vs Peers)

Country Sentiment Grid

Sentiment Grid: France. We combine the latest Sector positioning, long-term positioning and short-term fund activity in the 'Sentiment Grid', below. The Y-Axis measures where today's ownership levels in each Sector sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 9/30/2012). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 12/31/2021 and 6/30/2022, relative to each Sector. A figure above 50% means a Sector has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each Sector. The colour represents if the Sector is held overweight (blue) or underweight (red) on average.

Position Range: Average of:

Z-Score Average Weight vs history

Z-Score Funds Invested % vs history Z-Score Funds O/W % vs history Momentum Score: Average of: Change in Average Weight (Percentile vs Peers) Change in Funds Invested % (Percentile vs Peers) Change in Funds O/W % (Percentile vs Peers)

Aggregate Stock Holdings

Chart 1. The largest 10 stock holdings in France, by Average Weight. The chart also shows the average weight as a percentage of the total France weight, and the cumulative total.

Chart 2. Shows aggregate stock holdings data for France stocks, ranked by Funds Invested % (most widely held).

Chart 3. Top 5 overweight and underweight France stock positions / as a percentage of the total France weight relative to benchmark.

Charts 4&5. The largest overweight and underweight stock holdings, plus associated aggregate holdings data.

Stock Sentiment Grid

Stock Sentiment Grid: We combine current positioning, long-term positioning and short-term fund activity for France stocks in the chart below. The Y-Axis measures where today's ownership levels sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 9/30/2012). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 12/31/2021 and 6/30/2022, relative to each stock. A figure above 50% means a stock has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each stock. The colour represents if the stock is held overweight (folue) or underweight (red) on average.

Position Range: Average of:

Z-Score Average Weight vs history

Z-Score Funds Invested % vs history

Z-Score Funds O/W % vs history

Momentum Score: Average of: Change in Average Weight (Percentile vs Peers) Change in Funds Invested % (Percentile vs Peers) Change in Funds O/W % (Percentile vs Peers)

Holdings by Fund Style

Chart 1. The average weights in France stocks and the average weights vs the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap, solit by fund Style.

Charts 2&3. The time series of average fund weights in France stocks and average weights vs SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap, split by fund Style.

Chart 4. The percentage of funds invested in France stocks and the percentage of funds overweight, split by fund Style. Charts 5&6. The time series of the percentage of funds invested in France stocks and the percentage of funds overweight, split by fund Style.

Holdings by Fund Style

Top Row. For each Style category, each chart shows the largest holders in the France Country group.

Middle Row: For each Style category, each chart shows the most widely held stocks and the corresponding average fund weights in the France Country group. Bottom Row: For each Style category, each chart shows the largest stock overweights and underweights in the France Country group.

Aggregate Gap Analysis

Ch1. The blue line shows the total number of funds (out of 365) who have ever owned France stocks. The green area shows the number of funds invested at any one time and the red line the difference. A download sloping red line means existing investors are closing out positions, a rising red line means previous investors are buying back in.

Chart 2: The orange lines show the current AUM in France stocks for each fund. The red lines show the gap between today's weight and the maximum weight for each fund.

Chart 3: The Z-Score of current weights versus history for all current and previous holders of France stocks. A value of 100% means today's weight is the highest on record for that fund, zero the lowest.

Chart 4. Blue lines show the current weight in France stocks for each fund. The red lines show the gap between today's weight and the maximum weight for each fund.

Style Classifications

Each fund is split into a Style category based on the P/E and P/B ratios of their portfolio compared to the benchmark

Aggressive Growth: At least 70% of the portfolio in stocks with a higher P/E than the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap average, and at least 70% with a higher P/B ratio.

Growth: At least 50% of the portfolio in stocks with a higher P/E than the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap average, and at least 50% with a higher P/B ratio.

Value: Either by the fund description, or at least 50% of the portfolio in stocks with a lower P/E ratio than the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap average, and at least 50% with a lower P/B ratio

Yield: As per the fund description only (i.e Yield, Dividend, Income funds).

GARP: All other iterations that do not fit under the above classifications.
