

In this data report, we analyse Microsoft Corporation holdings among active Global Funds. For benchmark comparisons, we use the SPDR MSCI ACWI UCITS ETF - Hedged to EUR Cap, proportionally adjusted to remove any cash holdings. The current fund sample spans 365 active funds with a combined AUM of \$906.94Bn.

We analyse the latest published filings for all funds and aggregate together as of 6/30/2022. We show the most recent snapshot in positioning, time series data going back to 9/30/2012 and recent allocation shifts by the managers in our analysis.

All Cash Flow calculations are on a best estimates basis. We use monthly position changes and month end prices to estimate the net buying and selling value for each stock within each fund in our analysis.

Stock Sentiment Grid [Country]

Sentiment Grid: We combine the latest Stock positioning, long-term positioning and short-term fund activity in the 'Sentiment Grid', below. The Y-Axis measures where today's ownership levels in each Stock sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 9/30/2012). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 12/31/2021 and 6/30/2022, relative to each Stock. A figure above 50% means a Stock has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each Stock. The Grid is filtered for United States stocks only.
