# Singapore Financials Active Asia Ex-Japan Fund Ownership Report 7/31/2022

In this data report, we analyse Singapore Financials holdings among active Asia Ex-Japan Funds. For benchmark comparisons, we use the iShares Tr. - MSCI All Country Asia ex-Japan ETF, proportionally adjusted to remove any cash holdings. The current fund sample spans 93 active funds with a combined AUM of \$61.23Bn.

We analyse the latest published filings for all funds and aggregate together as of 7/31/2022. We show the most recent snapshot in positioning, time series data going back to 7/31/2011 and recent allocation shifts by the managers in our analysis.

All Cash Flow calculations are on a best estimates basis. We use monthly position changes and month end prices to estimate the net buying and selling value for each stock within each fund in our analysis.

7/31/2022

63.44%

Chart 1. The equally weighted average fund weight, among active Asia Ex-Japan managers by Country Sector Chart 2. The time series of average fund weight for Singapore Financials stocks

Chart 5. The 'Funds Invested %' measures the percentage of active Asia Ex-Japan funds with exposure to each Country Sector. A figure of 100% means that every fund in our analysis has some exposure to that Country Sector Chart 6. The time series of funds invested % for Singapore Financials stocks

Chart 3. The average fund weight minus the weight in the iShares Tr. - MSCI All Country Asia ex-Japan ETF, by Country Sector. A positive value represents an 'overweight' position on average, a negative value represents an 'underweight'. Chart 4. The time series of average fund weight minus benchmark for Singapore Financials stocks

Chart 7. The percentage of active Asia Ex-Japan funds who are overweight the iShares Tr. - MSCI All Country Asia ex-Japan ETF weight, by Country Sector

Chart 8. The time series of Funds Overweight % for Singapore Financials stocks

\$180.63M

\$5.27M

#### Ch 4. Singapore Financials: Top Fund Holdings, \$

### Aggregate Ownership Changes

Chart 1. Measures the largest changes in average Country Sector weight between 1/31/2022 and 7/31/2022.

Chart 3. Measures the largest changes in the percentage of funds invested in each Country Sector between 1/31/2022 and 7/31/2022.

Chart 5. Shows the cumulative fund flows for Singapore Financials stocks among the 93 active Asia Ex-Japan funds in our analysis. Monthly fund flows are estimated by multiplying the monthly change in stock position by the stock price for every position in every fund in our analysis.

#### Ch 1. Country Sector: Change in Average Weight 1/31/2022 - 7/31/2022

Cash & Other Products Cash & Other Pro				0.61%
Indonesia Financials				0.37%
India Financials				0.37%
Singapore Financials				0.37%
China & HK Consumer Discretionary				0.32%
China & HK Consumer Staples				).26%
China & HK Industrials				).24%

Country Sector Sentiment Grid

Sentiment Grid: We combine the latest Country Sector positioning, long-term positioning and short-term fund activity in the 'Sentiment Grid', below. The Y-Axis measures where today's ownership levels in each Country Sector sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 7/31/2011). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 1/31/2022, relative to each Country Sector. A figure above 50% means a Country Sector has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each Country Sector.

### Stock Sentiment Grid

Stock Sentiment Grid: We combine current positioning, long-term positioning and short-term fund activity for Singapore Financials stocks in the chart below. The Y-Axis measures where today's ownership levels sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 7/31/2011). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 1/31/2022 and 7/31/2022, relative to each stock. A figure above 50% means a stock has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each stock. The colour represents if the stock is held overweight (fund) on average.

Position Range: Average of: Z-Score Average Weight vs history Z-Score Funds Invested % vs history Z-Score Funds O/W % vs history Momentum Score: Average of: Change in Average Weight (Percentile vs Peers) Change in Funds Invested % (Percentile vs Peers) Change in Funds O/W % (Percentile vs Peers)

Chart 1. The average weights in Singapore Financials stocks and the average weights vs the iShares Tr. - MSCI All Country Asia ex-Japan ETF, split by fund Style.

Charts 2&3. The time series of average fund weights in Singapore Financials stocks and average weights vs iShares Tr. - MSCI All Country Asia ex-Japan ETF, split by fund Style.

Chart 4. The percentage of funds invested in Singapore Financials stocks and the percentage of funds overweight, split by fund Style.

Charts 5&6. The time series of the percentage of funds invested in Singapore Financials stocks and the percentage of funds overweight, split by fund Style.

Ch1. The blue line shows the total number of funds (out of 93) who have ever owned Singapore Financials stocks. The green area shows the number of funds invested at any one time and the red line the difference. A download sloping red line means existing investors are closing out positions, a rising red line means previous investors are buying back in.

Chart 3: The Z-Score of current weights versus history for all current and previous holders of Singapore Financials stocks. A value of 100% means today's weight is the highest on record for that fund, zero the lowest.

Chart 2: The orange lines show the current AUM in Singapore Financials stocks for each fund. The red lines show the gap between today's weight and the maximum weight for each fund.

Chart 4. Blue lines show the current weight in Singapore Financials stocks for each fund. The red lines show the gap between today's weight and the maximum weight for each fund.
