

Active UK Fund Ownership Report 9/30/2022

In this data report, we analyse Utilities holdings among active UK Funds. For benchmark comparisons, we use the SSgA SPDR ETFs Europe I Plc - FTSE UK All Share UCITS ETF, proportionally adjusted to remove any cash holdings. The current fund sample spans 275 active funds with a combined AUM of \$141.70Bn.

We analyse the latest published filings for all funds and aggregate together as of 9/30/2022. We show the most recent snapshot in positioning, time series data going back to 3/31/2012 and recent allocation shifts by the managers in our analysis.

All Cash Flow calculations are on a best estimates basis. We use monthly position changes and month end prices to estimate the net buying and selling value for each stock within each fund in our analysis.

Peer Group and Time-Series Ownership Data

Chart 1. The equally weighted average fund weight, among active UK managers by Sector

Chart 2. The time series of average fund weight for Utilities stocks

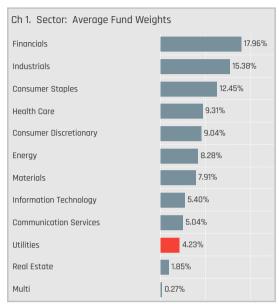

Chart 5. The 'Funds Invested %' measures the percentage of active UK funds with exposure to each Sector. A figure of 100% means that every fund in our analysis has some exposure to that Sector Chart 6. The time series of funds invested % for Utilities stocks

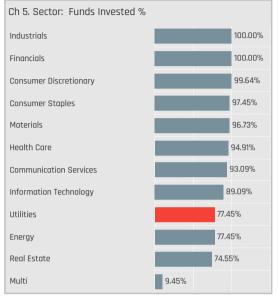

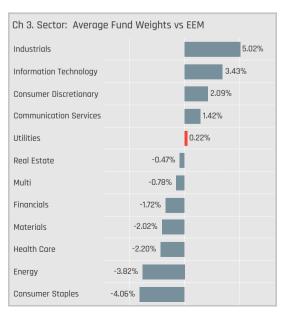

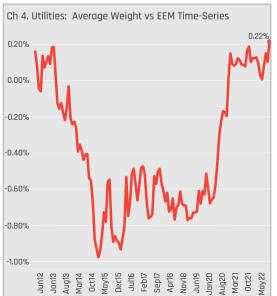

Chart 3. The average fund weight minus the weight in the SSgA SPDR ETFS Europe I Plc - FTSE UK All Share UCITS ETF, by Sector. A positive value represents an 'overweight' position on average, a negative value represents an 'underweight'.

Sector Sentiment Grid

Sentiment Grid: We combine the latest Sector positioning, long-term positioning and short-term fund activity in the 'Sentiment Grid', below. The Y-Axis measures where today's ownership levels in each Sector sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 7/31/2011). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 9/30/2021 and 9/30/2022, relative to each Sector. A figure above 50% means a Sector has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each Sector.

Stock Sentiment Grid

Stock Sentiment Grid: We combine current positioning, long-term positioning and short-term fund activity for Utilities stocks in the chart below. The Y-Axis measures where today's ownership levels sit relative to the long-term range. We calculate the Z-Score of today's average weight, funds invested % and funds o/w % relative to all monthly observations in our fund history (going back to 7/31/2011). A figure close to 100% would indicate today's positioning is close to its maximum ever level, a figure close to zero, the lowest. The X-axis provides a measure of short-term fund activity, or 'Momentum', by looking at the changes in average weight, funds invested % and funds o/w % between 9/30/2021 and 9/30/2022, relative to each stock. A figure above 50% means a stock has seen relative increases in ownership, a figure below 50% indicates a relative decrease in positioning. The size of the bubble represents the average weight of each stock. The colour represents if the stock is held overweight (fulue) or underweight (red) on average.

Ownership Calculations

We track UK Fund ownership across sectors, industries and stocks using a variety of calculations. They are listed below:

Average Weight: The sum of all fund weights in any measure (region, country, sector, industry, stock) divided by the total number of funds (275) in the analysis.

Average Weight vs EEM: The average weight minus the weight in the SSgA SPDR ETFS Europe I Plc - FTSE UK All Share UCITS ETF (cash removed and weights adjusted).

Funds Invested %: The total number of funds with any exposure to a measure divided by the total number of funds (275) in the analysis.

Funds O/W: The total number of funds overweight a measure versus the EEM, divided by the total number of funds (275) in the analysis.

AUM, \$: The combined AUM allocated to a particular measure across the 275 active UK funds in our analysis, in US Dollars
